

YASH BHATIA

Boston, MA | bhatia.yas@northeastern.edu | (857) 313 4049 | [linkedin.com/in/yash-bhatia-3a953a224](https://www.linkedin.com/in/yash-bhatia-3a953a224)

EDUCATION

Northeastern University, Boston, MA **May 2024**
Master of Science, Information Systems **GPA 3.52/4**
Relevant Coursework: Web Design/User Experience Engineering, Application Engineering & Development, Data Management and Database Design, Program Structures and Algorithms.

University of Mumbai, Mumbai, MH, India **June 2020**
Bachelor of Engineering, Electronics and Telecommunications **GPA 8.06/10**
Relevant Coursework: Applied Mathematics, Database Management System, Big Data Analytics.

TECHNICAL SKILLS

Programming languages: Python, Java, SQL, HTML, CSS, SASS, JavaScript, Node JS, Express JS, React JS, RESTful APIs

Database: Oracle, PL/SQL, MySQL, MongoDB, Hadoop

Tools and Technologies: Amazon Web Services (AWS), Postman, Tableau, Power BI, GitHub, JIRA, Informatica, MATLAB

Operating Systems: Windows, Linux, MacOS

WORK EXPERIENCE

Accenture Solutions Pvt Ltd *Application Development Associate* **Feb 2021 - Jul 2022**

- Performed data analysis, data extraction and delivered valuable insights using Business Intelligence tool **Power BI** to enhance decision-making across 6+ departments, improving business efficiency by **53%**.
- Optimized existing **SSIS** packages, mappings, and workflows in **Informatica** to load data from csv files into data warehouse, increasing build quality by **30%** in 7 weeks.
- Collaborated in **ETL** development tasks, shifting away from an obsolete system, decreased end-user waiting times by **40%** while integrating services like GitHub, **AWS**, and **CI/CD** pipeline into workflow design to align with data flows.
- Designed **UNIX** shell scripts for automation of ETL jobs operating on AutoSys scheduler, increasing efficiency by **44%**.
- Interacted with cross-functional team members by drafting client requirements specifications.
- Recorded all technical, implementations, and status updates within **JIRA** while working on **Agile** methodology.

Trivia Softwares *Python Developer Intern* **Jun 2018 - Jul 2018**

- Programmed **OpenCV**, **NumPy**, **Pandas** and **Matplotlib** data science libraries to devise data retrieval system.
- Utilized **Beautiful Soup** for web scrapping to extract data for building graphs, gaining **90%** accuracy for analysis.

PROJECTS

Bookstore Management System | Oracle, PL/SQL, Tableau **Apr 2023**

- Developed a comprehensive system, handling customer, bookstore, and inventory details, and implemented 20+ **procedures**, **functions**, and **packages**, boosting functionality and performance of the database.
- Optimized **SQL** queries and indexing strategies, resulting in a **45%** reduction in query response time and improved overall system performance.
- Implemented robust validation rules and access controls, ensuring data integrity and security for a database with 10,000+ records.
- Created charts and graphs leveraging data visualization tool **Tableau** to present data patterns and making data analysis more accessible, also facilitating data-driven decision-making for management and marketing strategies.

Gym Ecosystem | Java, MySQL, NetBeans **Dec 2022**

- Developed a Java application to create a network connecting city to a gym and its related entities in a managed ecosystem, enabling gym members to enroll in diverse programs, resulting in an enhanced member experience.
- Created use cases and **UML** diagrams – activity, sequence, and class – using **Visio** in line with project goals.
- Supplemented a robust authentication module for different login access as per roles in ecosystem.
- Configured application with **MySQL** database and added **Google SMTP** for email verification of user credentials.

Brainterest – Blog App | HTML, CSS, MERN Stack, RESTful API, Postman **Dec 2022**

- Designed a community driven blogging website, allowing users to sign up and publish blogs.
- Built front-end of website with **React JS** resources, optimizing performance and achieving a 25% increase in page load speed. Integrated back-end use of **Node JS**, **Express JS**, and **MongoDB** to provide the **RESTful API**.
- Prioritized security by incorporating password **hashing** at the login page, safeguarding user credentials, and ensuring data integrity resulting in a 95% reduction in the risk of unauthorized access.
