## Job Description

---

Req#: R0052255

Employer Industry: Software Development

Why consider this job opportunity:

- Salary up to \$160,000.00
- Comprehensive benefits including premier medical, dental, and vision insurance with no waiting period
- Paid vacation, sick leave, and parental leave
- 401(k) plan and tuition reimbursement options
- Opportunities for professional development through paid training and licensures
- Work in a fast-paced, innovative environment with a chance to solve critical problems

What to Expect (Job Responsibilities):

- Collaborate with product managers, team members, and customers to address complex problems
- Develop and execute technical software development strategies for the organization

- Ensure the quality, usability, and performance of software solutions
- Lead projects and maintain regular interactions with clients and sponsors
- Provide on-call and operational support as needed

#### What is Required (Qualifications):

- Advanced knowledge of at least one modern OOP language such as Python or Go
- Minimum of 2 years of professional experience in software development and platform architecture
- At least 2 years of experience with AWS, GCP, Azure, or hybrid data centers
- Strong understanding of service integrations and communication standards (e.g., GRPC/REST)
- Bachelor's degree in computer science, Information Systems, or equivalent education or work experience

#### How to Stand Out (Preferred Qualifications):

- Familiarity with open-source databases like MySQL, PostgreSQL, and No-SQL databases like Cassandra, MongoDB
- Experience with continuous delivery (CI/CD) and Infrastructure as Code
- Knowledge of developer tooling across the software development life cycle
- Experience with open-source tools like GIT, Jenkins, CircleCI, and knowledge of Pulumi, Terraform, or Ansible
- Ability to excel in a startup-like environment
