

YASH BHATIA

Boston, MA | bhatia.yas@northeastern.edu | (857) 313 4049 | [linkedin.com/in/yash-bhatia-3a953a224](https://www.linkedin.com/in/yash-bhatia-3a953a224)

EDUCATION

Northeastern University, Boston, MA **May 2024**
Master of Science, Information Systems **GPA 3.52/4**
Relevant Coursework: Network Structures and Cloud Computing, Web Design/User Experience Engineering, Data Management and Database Design, Program Structures and Algorithms.

University of Mumbai, Mumbai, MH, India **June 2020**
Bachelor of Engineering, Electronics and Telecommunications **GPA 8.06/10**
Relevant Coursework: Applied Mathematics, Database Management System, Big Data Analytics.

TECHNICAL SKILLS

Programming languages: Java, Python, JavaScript, SQL, HTML, CSS, Node JS, Express JS, React JS, RESTful APIs

Database: Oracle, PL/SQL, MySQL, MongoDB, PostgreSQL

AWS Services: EC2, RDS, VPC, Lambda, Security Groups, Load Balancer, CloudWatch, DNS, Route53, IAM, SES, SNS

Tools and Technologies: Amazon Web Services (AWS), Docker, Jenkins, VS Code, Postman, GitHub, JIRA

WORK EXPERIENCE

Accenture Solutions Pvt Ltd *Application Development Associate* **Feb 2021 - Jul 2022**

- Developed several **REST** web services supporting **JSON** and maintained scalable backend systems with **Java** using the **Spring Boot** framework, resulting in a 32% improvement in application performance.
- Worked with unit testing using **JUnit** and Spring Test and extensive use of **GIT** to manage source code.
- Successfully created and maintained automated **CI/CD** pipelines for code deployment using **Jenkins** while automating the deployment process, resulting in elimination of **54%** of manual work
- Deployed an application on **AWS EC2** instance and utilized **Docker** container to create Docker images.
- Designed **UNIX** shell scripts for automation processes, increasing efficiency by **44%**.
- Recorded all technical, implementations, and status updates within **JIRA** while working on **Agile** methodology.

Trivia Softwares *Python Developer Intern* **Jun 2018 - Jul 2018**

- Used Python and **Django** for the backend development, Bootstrap and Angular for frontend Connectivity and MongoDB for the database.
- Written functional API test cases for testing **REST APIs** with Postman and Integrated with Jenkins to build scripts.

PROJECTS

Learning Management System | AWS, RDS, JavaScript, MySQL, RESTful API **Oct 2023**

- Developed a **cloud** native web application and implemented authenticated **RESTful** services utilizing **Bcrypt** hashing.
- Successfully established Continuous Integration (**CI**) using **GitHub** Actions for automated integration tests and code quality checks to ensure application reliability.
- Deployed the application on **AWS**, ensuring high availability and fault tolerance by implementing **AWS Auto Scaling** and **Load Balancing**, while integrating it with **Amazon RDS** for the database.
- Leveraged **Pulumi** for Infrastructure as Code (**IaC**) and managed **DNS**, **CloudWatch**, **VPCs**, **Route53** hosted zones and health Checks.

Airline E-commerce | Java Spring Boot, MySQL, AngularJS, Thymeleaf **Dec 2022**

- Developed a web application using **Spring Boot**, **Spring data JPA** and **MySQL** where users can login and book a flight.
- Created an Integration layer **RESTful API** for flight check-in microservice to check in passengers with reservations.
- Designed front end templates using **Thymeleaf** and styled them using **Bootstrap** and **CSS**.

Brainterest – Blog App | HTML, CSS, JavaScript, MERN Stack, RESTful API **Dec 2022**

- Designed a community driven blogging website, allowing users to sign up and publish blogs.
- Built front-end of website with **React JS** resources, optimizing performance and achieving a 25% increase in page load speed. Integrated back-end use of **Node JS**, **Express JS**, and **MongoDB** to provide the **RESTful API**.
- Prioritized security by incorporating password **hashing** at the login page, safeguarding user credentials, and ensuring data integrity resulting in a 95% reduction in the risk of unauthorized access.

Image Caption Generator | Python **Sep 2022**

- Designed and created an application to analyze images and convert to natural language (English) descriptions.
- Utilized deep learning techniques to implement a **convolutional neural network (CNN)** with recurrent neural network (**LSTM**) to build the image caption generator.
- Created an application in Python using a **Keras** framework against a **Flickr 8K** dataset.
