Attn: Hiring Manager

I am writing to express my strong interest in the Software Engineering Co-op position at Wayfair. With a strong academic background and hands-on experience in software development, I believe I am well-suited for this role.

As a Master of Science in Information Systems student at Northeastern University, I have honed my technical skills in object-oriented programming, web development, and data management. My coursework has also exposed me to cloud computing, making me well-prepared to contribute to complex technical projects.

During my time at Accenture, I had the opportunity to work on data analysis, data extraction, cloud concepts, and application deployment in an agile environment. My tenure at Trivia Softwares as a Python Developer Intern exposed me to application development, machine learning and data science concepts. These experiences taught me the importance of project life cycle and collaboration in software development, skills that align with the responsibilities at Wayfair. In addition to my technical skills, I am a strong communicator and have a track record of academic excellence. I am eager to work on challenging projects, collaborate with cross-functional teams, and continue to expand my knowledge in software engineering.

I am drawn to Wayfair because of its commitment to professional development and the opportunity to work on impactful projects make this co-op program an ideal fit for my career goals. I'm passionate about using technology to solve real-world problems and I'm excited to work with like-minded professionals and contribute to the goals of team at Wayfair.

I have attached my resume, which further details my academic background and professional experience. I look forward to speaking with you in further detail about the co-op position and opportunity with Wayfair.

Sincerely,
Yash Bhatia
